Professional services

Team up with Nviron.

Nviron
Simplifying IT

IT that works
for you

Over the years, we've built strong, trusted relationships with some of the biggest names in tech including Microsoft, Dell Technologies and VMware by Broadcom.

Our team puts real time and energy into staying sharp, earning the latest certifications and keeping up with the ever-changing world of IT. We're always learning, adapting and staying ahead with the latest technology and industry developments.

We're proud to hold key industry accreditations like ISO 9001, ISO 27001 and Cyber Essentials Plus, so you can be confident you're working with a team that knows their stuff and puts quality and security first.

Your business is unique to you, as is your way of working. That's why we've devised three clear engagement types for our professional services, ensuring the right choice is available for your project.

Key features

Fixed price

Ever wish there was a way to control spiralling project costs?
Would you like your delivery partner to own your project risk?
Nviron's fixed price solution offering might be for you.

Our fixed price engagement will begin with an in-depth solution design exercise. Our solution architects will work with you to scope and design a solution that focuses on achieving your objectives.

With the design finalised and an outcome agreed, Nviron will quote a fixed price for installation services, project management and any associated products and subscriptions. This gives you total peace of mind, and an Nviron promise, that your objective will be met at the price agreed.

On usage

Do you like to be hands-on or have flexibility during a project?
Are you looking for a guaranteed outcome through collaborative delivery?
Nviron's On usage solution engagement might be the right fit.

Working with you, our solution architects will scope and design a solution that meets your business objectives. Once we agree on the design, Nviron will quote and provide estimates for the products, subscriptions and professional services required.

Give us the green light and our goal will be to deliver your completed project within or ahead of the pre-agreed timescales. Of course, if things change, then the price may too. But we're nothing if not understanding.

Time & materials

Time and materials (T&M) is our 'ultimate flexibility' delivery model, it does what it says on the tin.

Unlike our solution engagements (see fixed price and on usage), there is no fixed scope. With T&M, the customer assumes overall responsibility for achieving the objectives.

Nviron's skilled solution architects, technical consultants, service engineers and project management team will work under your direction to meet the objectives of the project.

T&M engagements are helpful when you need to start quickly or have too many variables to tie down a scope. It can be used for anything from project delivery to getting Nviron to complete those niggly maintenance tasks that keep moving down the to-do-list.

4

We're proud to say we've built an incredible team. For over 30 years, we've been a trusted technical authority in the IT Services and Solutions space, covering everything from Connectivity to Security and Collaboration.

Infrastructure

Microsoft Windows Server

Advanced Solutions across S, N & X series and OS10

Dell Technologies Server and Storage Platforms

World-class system host and storage platforms

Microsoft Azure Stack HCI

Hyperconverged infrastructure platform with Azure integration

Dell Technologies APEX Multicloud nodes

Multicloud nodes for hybrid cloud deployments

Dell Technologies VxRail

Integrated Hyperconverged infrastructure platform on VMware by Broadcom

Microsoft Storage Spaces Direct

Server and ready node hosted virtualisation

Microsoft Hyper-V

Microsoft virtualisation deployment and evolution on Windows Server

VMware vSphere and vSAN

VMware by Broadcom, software defined virtualisation and storage

Dell Technologies PowerEdge Servers

Market leading server infrastructure implementation

Dell Technologies Ready Nodes

Server appliances for VMware and Microsoft HCI

VMware Horizon

Advanced VDI solution from VMware

Batch Client Device Deployment

Efficient customisation and rollout of laptops, desktops and tablets

APC UPS

Implementation and configuration of advanced UPS

Co-location

Infrastructure hosting and migration services

Linux Infrastructure

Appliance and system deployment

Secure Networking

Dell Technologies Networking

Advanced Solutions across S, N & X series and OS10

Cisco / Meraki Networking & Wi-Fi

Secure wired and wireless networking solutions

Fortinet Networking & Wi-Fi

Secure wired and wireless networking solutions

Ruckus Networking & Wi-Fi

Secure wired and wireless networking solutions

HPE / Aruba Networking and Wi-Fi

Secure wired and wireless networking solutions

SonicWall NextGen Firewall

Internet security solutions

Azure DNS

Secure and highly available DNS hosting in Azure

Azure Networking

Advanced networking services for Azure environments

Kemp Load balancing appliances

Appliance based balancing for web access applications

Wide Area Networking Circuits

Supply and management of WAN and Internet circuits

Aerohive Wi-Fi infrastructure

Wireless access solutions from Aerohive

Digital Certificates

Mixed use certification infrastructure configuration and deployment

FortiGate NexGen Firewall

Advanced physical, virtualized and cloud NextGen firewalls from Fortinet

Fortinet ZTNA / FortiClient

Remote access and security from Fortinet

Netgear Networking

Secure Wired access solutions from Netgear

Ubiquiti Wi-Fi Infrastructure

Wireless access solutions from Ubiquiti

Business Continuity

Dell Technologies DataDomain

Advanced deduplication and backup vault

Dell Technologies DP4400 & DPA

Fully integrated backup and retention appliances

Microsoft System Center DPM

Advanced backup and replication technologies from Microsoft

Microsoft Azure Backup

Utilising Microsoft Azure for your backup data

Microsoft Azure Site Recovery

Replication, failover and recovery using Microsoft Azure

Veeam Backup & Replication for M365

Backup for your M365 environment

Veeam Backup & Replication

Backup and Replication for virtual, cloud, physical and immutable requirements

Veeam Cloud Connect

Cloud backup for virtualised infrastructure

Veeam Availability Orchestrator

Disaster Recovery orchestration and automation

System Replication Solutions

Hyper-V and VMware virtual machine replication solutions

Cyber Security
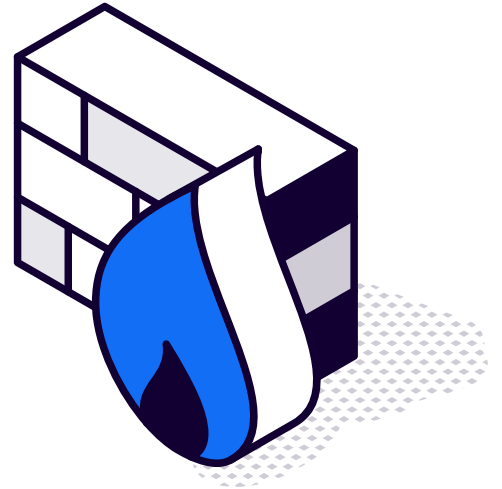

Cyber Essentials & Cyber Essentials Plus

Help with governance & compliance. Attain and maintain certification

SentinelOne

Endpoint threat protection from SentinelOne

FortiMail

Cloud hosted email security from Fortinet

Forcepoint Mail & Web Filtering

Centralised cloud hosted email and web security

Microsoft BitLocker Encryption

Windows encryption technology for your data

Microsoft Defender

Integrated device and Exchange Online security from Microsoft

Microsoft Azure Entra & MFA

Conditional and authentication security technologies

Microsoft Federation Services

Cloud and On-premises Active Directory integration

Azure Application proxy & ARR

Web access application separation and security

Microsoft Purview

Azure Information protection, DLP and enhanced security features

Azure Tenancy Security

Baselining and best practice configuration and protection for Azure

Microsoft Sentinel

Scalable, cloud-native security information and event management

Always on VPN

Secure remote access services

Draytek Vigor Firewall

Network security from Draytek

Microsoft

Microsoft 365 Suite

Cloud Solution provider (CSP) deployment

and configuration services

Microsoft Active Directory

Services design, update and evolution

Microsoft Azure

Services including migrations, Landing Zones tenancy creation and optimisation

Microsoft Copilot

Leverage the power of AI to boost productivity

Azure Virtual Desktops

Cloud hosted desktop services from Azure

Microsoft RDSH & RDV

On-Premises hosted desktop services

Microsoft Intune

Cloud-based endpoint management solution

Microsoft Autopilot

Technologies for device set up and configuration

Microsoft 365 Suite

Deployment and configuration services for M365

Microsoft Endpoint Configuration Manager / SCCM

Windows centric endpoint management services for AD connected devices

Microsoft Exchange

Deployment and directory integration for Exchange online and on-premises

Our partners

Nviron has established strong relationships with leading technology providers and security sits at the heart of everything we do. We harness the technology developed by some of the most revered names in the industry to create exceptional services and solutions.
